Creative Clips

Directions:

To use booklet: Print, cut, and staple!

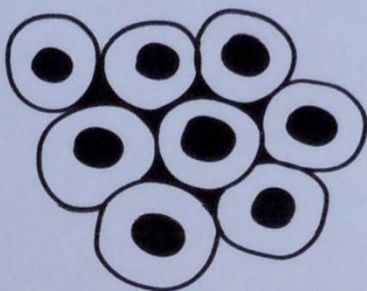

Then, have students color and fill out their booklets using the word list provided.

After students fill out their booklets, have them practice sequencing the Frog Life Cycle by placing the steps in the correct order. Print Frog template (two per page). Print the sequencing steps (one copy for every two students), cut, and paste onto the frog template.

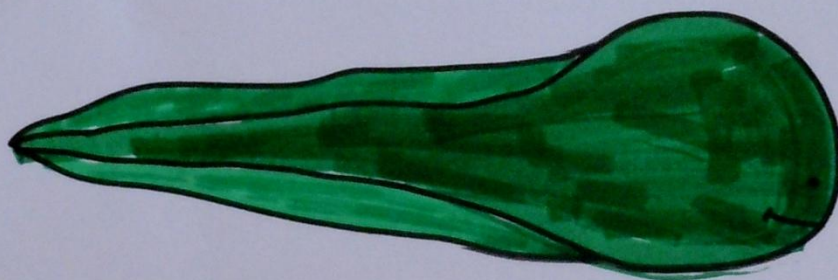

***For students who might need it, I have also included the sequencing steps already in the correct order.

To make the foldable: take 2 sheets of paper, fold them in half (hamburger), staple twice at the top.

Frog Life Cycle

Name: _____

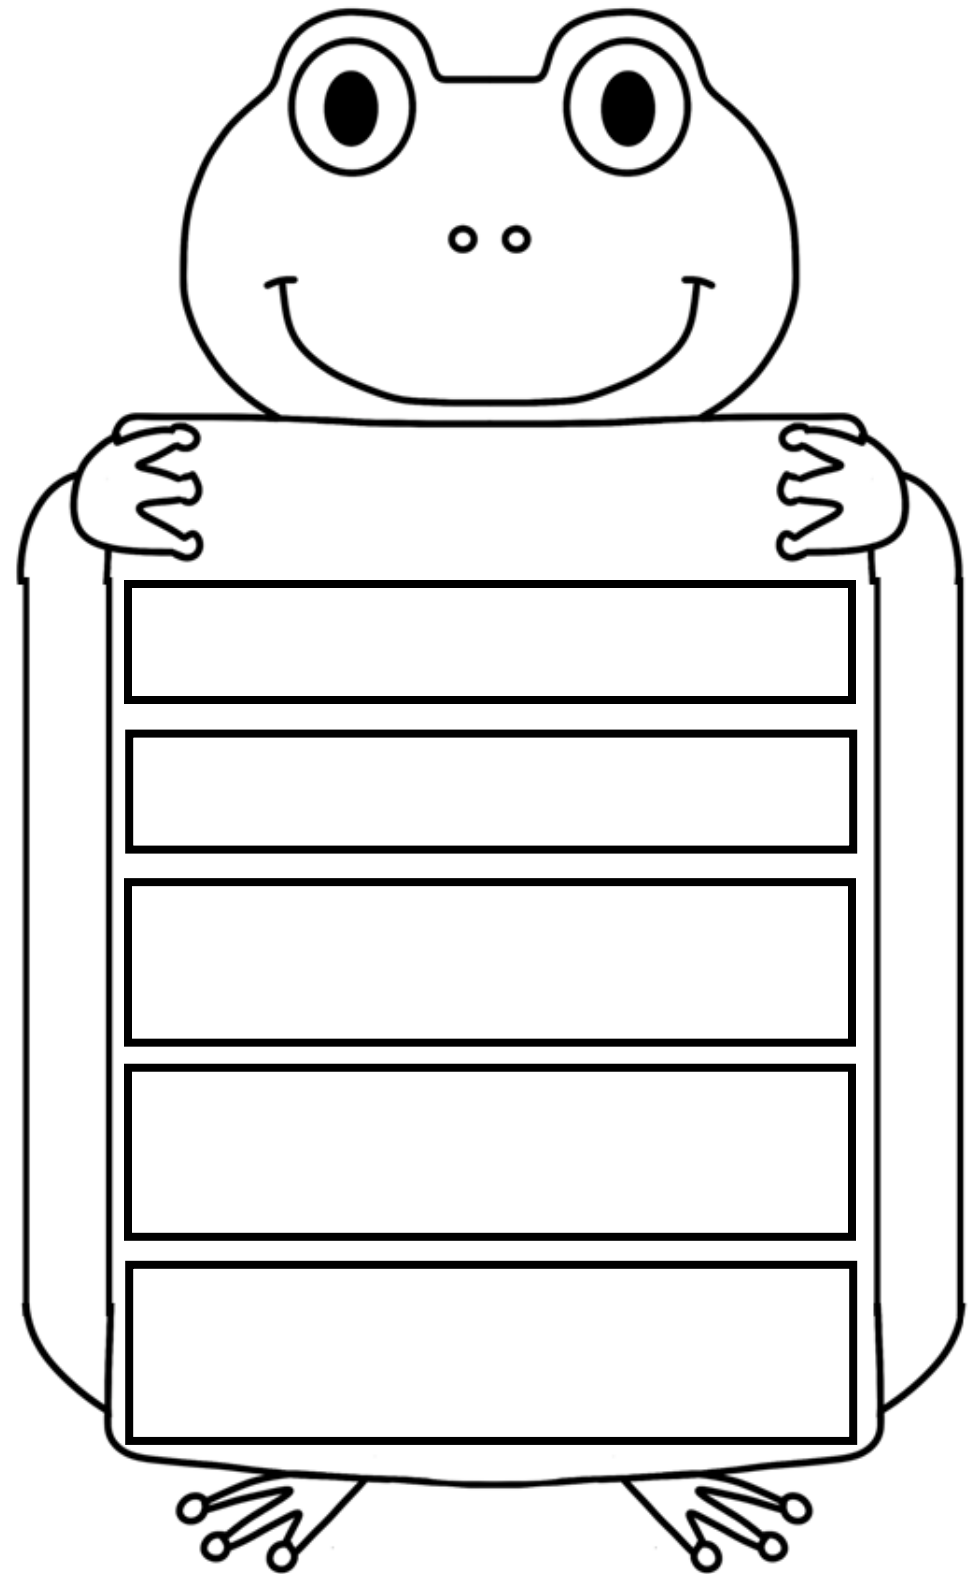

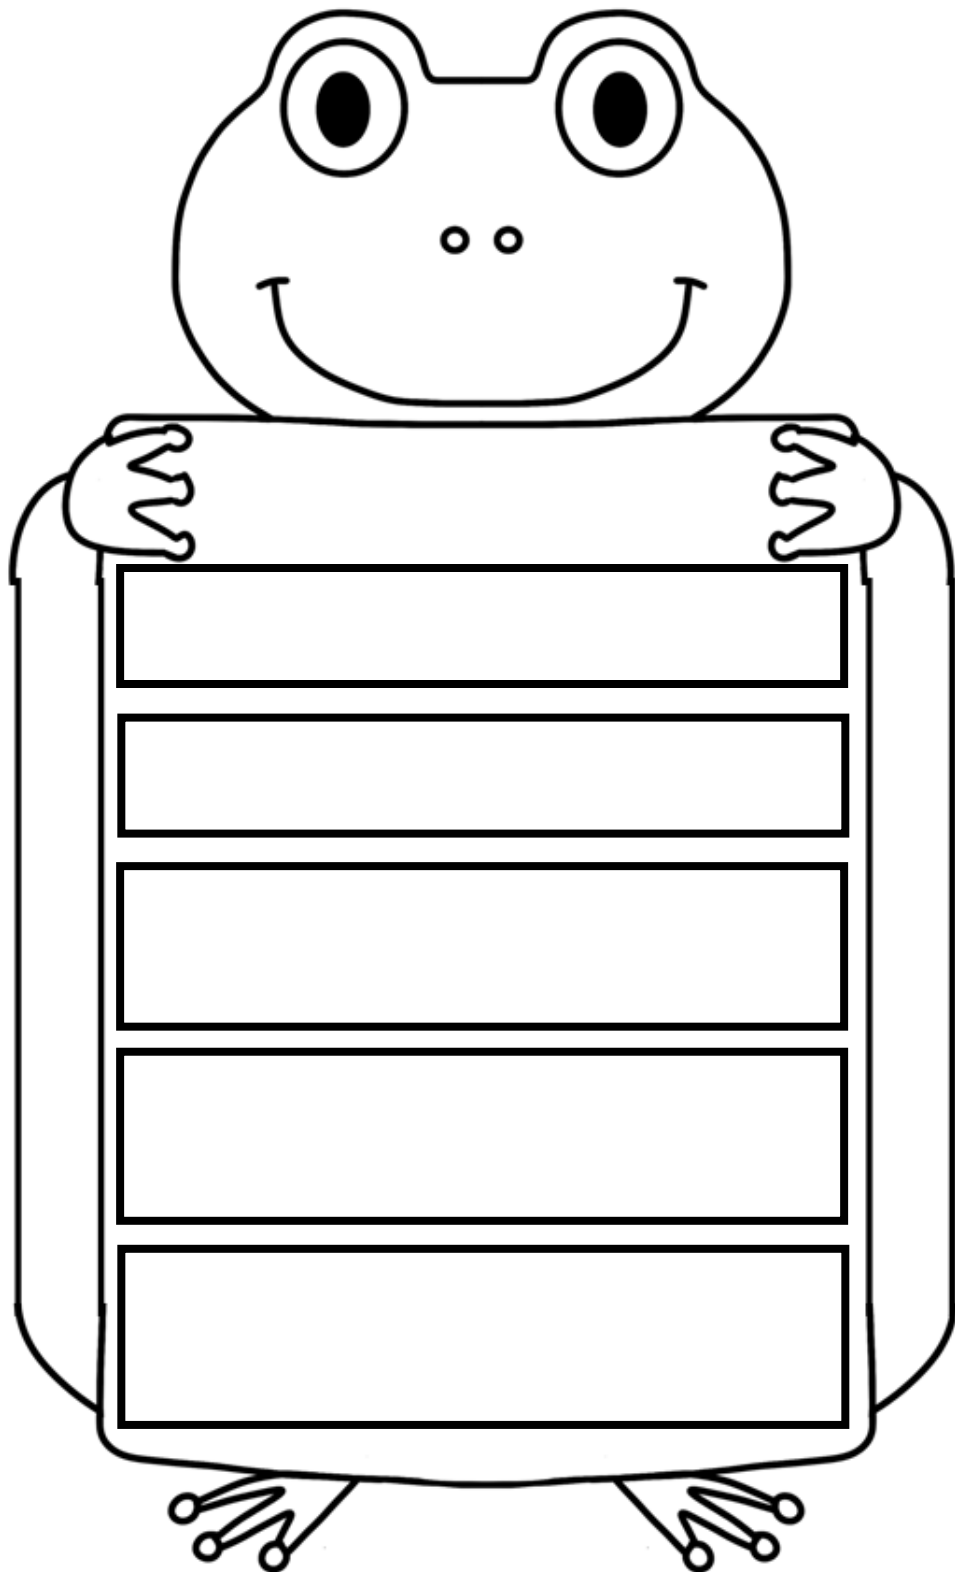

frog

eggs

tadpole

froglet

A female frog lays many eggs.

The eggs hatch into tadpoles.

The tadpoles live and breathe in the water.

The tadpoles grow back and front legs.

The tail shrinks and the tadpole grows into a frog.
